

# FLOORCARE

1720/00  
5 LITRE

## FLOOR POLISH STRIPPER INFORMATION SHEET

### USE:

Effectively strips emulsion polishes from most floor surfaces, including sealed wood or cork.

### DIRECTIONS:

Dilute approximately 1 to 10 with water to achieve effective results. It may be spread with a mop or machine equipped with a tank. Leave in contact with the polish for between 5 - 15 minutes before machine scrubbing with a black stripping pad, never allow the stripper to dry as this will make polish harder to remove, divide the floor into areas where the whole process may be completed before the solution dries. Always rinse well and allow the floor to dry thoroughly before re-applying polish. A small amount of a mild acid such as vinegar may be added to the final rinse to neutralise the floor.

### TECHNICAL:

State:	Liquid
Colour:	Red
Odour:	Characteristic odour
Oxidising:	Non-oxidising (by EC criteria)
Solubility in water:	Soluble
Also soluble in:	Most organic solvents.
Viscosity:	Non-viscous
Flash point°C:	>70
pH Level:	13

**PERSISTENCE AND DEGRADABILITY:** The surfactants in this product comply with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents. Data to support this assertion are held at the disposal of the component authorities of the Member States and will be made available to them at their direct request or at the request of the detergent manufacturer.
